OFFICE BUILDING

# An Invitation TO YOU—TO VISIT OUR NURSERY

OFFICE BUILDING AND ENTRANCE TO NURSERY

You will find a visit to our Nursery very interesting and worth while. Many acres of highest-quality stock in a wide range of plant varieties are available for your inspection and selection.

A visit when the Ornamental Trees, Shrubs, or Rhododendrons are in bloom is especially interesting and is an excellent time for making selections. Information concerning the various plants and their proper use and care will be cheerfully given.

## LANDSCAPE SERVICE

LET us work with you and help you with your planting problems. Artistic and satisfactory landscape effects are the result of careful planning and the proper use of the right plant material. Our Landscape Department is maintained as part of our service to our customers, so that you may realize the utmost pleasure and satisfaction in the use of our materials.

The ability and experience of Bulk's Nurseries are reflected in the landscaping of many fine home-grounds, estates, and public plantings throughout Long Island and suburban New York. "PLANTED BY BULK'S NURSERIES" is synonymous with first-class workmanship, tasteful arrangement, and lasting satisfaction.

We will gladly draw sketches and plans to fit your particular needs, whether it be for a complete treatment of the entire grounds, a foundation planting, a special planting of any kind, or a revamping of an established planting. This service, in most cases, is rendered free of cost, except where elaborate plans, specifications, and special trips are necessary, in which case a small fee will be charged, which will be credited to our customer's account when order is placed.

Phone Babylon 444, or drop us a card and our representative will be glad to call on you to make suggestions and offer advice, without obligation to you. Our service extends throughout entire Long Island and the Metropolitan area.

Appointments at your home, any day including Sunday, will be gladly made and kept.

### NURSERY SALES SERVICE

Prompt and efficient service is available for those who wish to call and select plants to take home with them. Our Nursery is open on Sundays during planting season, and experienced nurserymen will assist you in making selections, and show you around.

Our nursery stock is the finest that skill and good culture can produce, and our plants have an abundance of fine fibrous roots which are so essential for continued healthy growth.

### HONEST VALUE

for every dollar invested in our products is the policy of Bulk's Nurseries, and we are proud to live up to this reputation. Our prices are as reasonable as is consistent with the highest grade of materials, and we invite you to make comparisons with any stock of similar quality.

### WELCOME—WORLD'S FAIR VISITORS

After viewing the wonderful planting exhibits at the World's Fair, we urge you to drive out and see the many acres of high-quality Long-Island-grown nursery stock which has contributed so much in making the World's Fair plantings so outstanding.

Let us help you crystallize some of the many fine ideas revealed into practical home-ground plantings.

**BULK'S NURSERIES • Babylon, Long Island, N. Y.**

MANY YEARS of patient, painstaking care and cultivation are necessary for the production of good nursery stock, and here at Bulk's Nurseries we take pride in the fine reputation our stock has earned. The quality of the product is no higher than the integrity of the producer, and we assure you there is a vast difference between the results obtained with well-grown, freshly dug plant material and the bargain-priced nursery stock sometimes offered.

When you purchase plants from Bulk's, you are assured of this inner value and may anticipate years of lasting satisfaction.

## Planting Seasons

Evergreens may be planted from the time the frost leaves the ground until the latter part of June, though early planting is much preferred. Some varieties can be moved satisfactorily during the summer months. August, September, and October are excellent months.

Plant shrubs, trees, and fruit trees from the latter part of March until June, and from the middle of October until the ground freezes. Pot-grown Roses can be moved the entire summer and continue to bloom.

### GUARANTEE

Because all our stock is freshly dug and reaches the customer in fine, healthy condition, and because of the utmost care and skill used in growing our plants, we agree to replace any plants sold, at the prices published in this book, that may die within one year from date of delivery from other causes than abuse or neglect, but we make the following reservations:

The account must be paid within 30 days from date of invoice.

The customer pays the cost of delivery and planting of the replaced plants.

In the event we shall not have in stock, at the time for replacement, plants like those originally supplied, we are to apply the amount of credit representing the cost of the original plants toward the purchase of other plants that the customer may at the time select and which we can supply.

We guarantee our stock to be true to name and will replace any that proves otherwise, or refund purchase price.

The air-view below indicates to some extent the size of our nurseries. It is here that Bulk's quality stock is carefully grown for you.

### GENERAL DIRECTIONS FOR ORDERING AND OUR TERMS

Always give address and desired time of delivery; otherwise we forward by the most economical route. Practically all our deliveries will be made by our trucks. Our free-delivery radius, on orders amounting to \$10 or more, extends 30 miles from our Nursery. This enables distant customers to get the benefit of local prices. During planting season, loads are combined for each locality at least twice a week. Beyond this 30-mile limit, a small charge will be made for delivery to cover cost, unless otherwise arranged at time of sale.

The cost of planting, if we do it, is borne by the purchaser. Our charge merely covers the cost of labor, fertilizer, etc.

## FLOWERING TREES SHOWER THE LAWN WITH THEIR FRAGRANT BLOOM

### ORNAMENTAL and SHADE TREES

**I**N ADDITION to the trees which are valued for their shade, there are flowering trees which, at different times during the spring and summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

The abbreviation "cal." means the caliper or diameter of the tree 6 inches above the ground.

18 to 24 ft., 8 to 9-in. cal.	75.00

**A Safe Investment.** *Planting is one of the few investments which do not depreciate. It always brings increased returns in actual value and satisfaction. Shade trees, ornamental trees, and flowering shrubs create value that increases the worth of a property at least 20%. The return is immediate and it increases every year.*

# Flowering Shrubs

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry-yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early spring until fall. In the list that follows will be found shrubs for all such purposes.

# Broad-leaf Evergreens

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade, and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as Rhododendrons, Azaleas, and Laurel, ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal. As a rule, they dislike lime, or limestone soil, and success will be more certain on such soils if they are planted in woods earth or mulched with peat moss. Oak leaves are ideal for covering the ground beneath them.

## AZALEA

For Deciduous Azaleas, see pages 9 and 10

**Azalea amoena.** *Japanese Azalea.* Purple-red blooms produced in a solid mass during April and May. The lustrous leaves take on a rich bronze in the fall, making this a most attractive plant. It is a vigorous grower. Does well in shady locations.

## Evergreens

**I**N this group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provide truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for any landscape plantings for both summer and winter effects.

### ABIES . The Firs

**Abies concolor.** *White Fir.* Rapid-growing evergreen, with long, bluish green needles, and of symmetrical, upright habit. Splendid as a lawn specimen, as a contrast with the darker foliage of other trees, and is also useful in serene and border plantings. It is a tree of great dignity and stateliness and when given plenty of room to develop naturally, it keeps its magnificent lower branches until late in life.

## Evergreen Hedges

From time immemorial people have used hedges and fences to protect their property from intrusion and to secure privacy. Until recently an evergreen hedge meant quite an expense, but they have now come down to a price-level within the reach of every home-owner. We invite you to compare the prices listed below with the cost of a fence.

### ARBORVITÆ

**American.** Makes a very dense, fast-growing hedge that will reach considerable height if left to grow. Set plants 2 to 3 feet apart.

# TAXUS (The Yew)

Without question, the Yew (Taxus) in its various forms is the outstanding evergreen for use on the home-grounds and in general landscaping, for its dark green, rich-textured foliage is always fresh-looking and attractive. It is extremely hardy, not affected by cold or heat, and will grow in shade as well as sun. A slow grower and lends itself well to shearing. There are forms for various uses which are described below.

For years Bulk's Nurseries have specialized in the growing of Yews in many varieties, and the fine quality of our stock is widely known. We have a large and complete list and can supply your needs at prices that invite comparison.

BULK'S NURSERIES, Babylon, Long Island, N. Y.

**Thuja occidentalis, Columbia.** *Columbia Arborvitæ.* Pyramidal form, with silvery-tipped foliage. An excellent variety for group plantings.

**T. occidentalis lutea.** *George Peabody Arborvitæ.* A well-known variety forming a broad pyramid, with golden yellow foliage that is strikingly contrasted against the grays and greens of other evergreens.

**T. occidentalis plicata.** *Giant Arborvitæ.* Pyramidal shape. Deep blue-green foliage with triangular whitish spots. As its name implies, it attains considerable height.

**T. standishi.** *Standish Arborvitæ.* This is a loose, open type of Arborvitæ, with rich green foliage that is more feathery in appearance than any of the other Arborvitæs. It is often used in informal plantings.

	Prices of above four varieties: Each		Each
2 to 2½ ft.	\$1.00	5 to 6 ft.	\$4.50
2½ to 3 ft.	1.50	6 to 7 ft.	6.00

## Hardy Perennials

IT IS no wonder that these old-fashioned hardy garden flowers continue to increase in popularity, for there is not a time during the whole flowering season when some hardy perennial is not in bloom, and when, during the late summer, few shrubs are in blossom, these little plants may be depended on for attractive display.

Plant perennials this year in the flower-bed where you have been using annuals. Every year you have to replace annuals, whereas the perennials come up each season with very little work or expense.

Prices for Perennial Plants, except where otherwise noted: Strong field-grown plants, 25 cts. each, \$2.50 per doz., \$18 per 100 plants; large clumps, 35 to 50 cts. each

**Spraying of Fruit Trees.** For best results we recommend three sprayings: First, during the winter; second, after the blossoms fall; and, third, about two weeks later. This will control the most prevalent insects and fungous diseases attacking fruit trees on Long Island. We have men experienced in this kind of work who are available at a moderate cost.

### NUTS

Set out a few Nut Trees. They make splendid ornamental trees and yield a bountiful harvest of nuts. We are offering only improved varieties, best suited to Long Island conditions. Grafted trees.

## THREE BULK SPECIALTIES

Pictured here are three of the finest garden plants to be found anywhere.

Plant Patent applied for

### ROME GLORY. (Aicardi, 1937)

A cross of Dame Edith Helen and Sensation. This Rose was bred with the objective of raising a red Dame Edith Helen and the objective has been reached. A most robust and vigorous plant, much more winter-hardy than most Hybrid Teas, producing in quick succession long stems bearing large crimson-red buds, opening into full, well-formed, fragrant, cerise-red blooms. The flowers are long-lasting on the plant or when cut and are not affected by dry or wet weather.

### CHRYSANTHEMUM · Pink Cushion

Perfect mounds about a foot high and 3 to 4 feet across are covered for weeks in late summer and early fall with semi-double flowers of deep pink. 30 cts. each, \$3 per doz.

### VERONICA · Blue Spire

A splendid addition to the Veronica family. It is a cross of *V. longifolia subsessilis* and *V. spicata*, retaining the good qualities of each. The bushy plants put up a number of bloom-stems, each ending in the lovely spikes of deep blue flowers shown above. The plants grow about 2 feet tall and are attractive at all times, as the stems carry foliage right up to the flowers. 35 cts. each, \$3.50 per doz.
